

Trade With Precision

Control the trade. See the risk.
Execute with confidence.

DISCLAIMERS & FORWARD LOOKING STATEMENTS

This proprietary presentation (the “Presentation”) is given for general informational purposes only and shall be kept strictly confidential. Until a Definitive Agreement is executed and delivered, there shall be no legal obligations owed by either party of any kind whatsoever (other than those relating to confidentiality) with respect to any of the material contained in the Presentation. The term “Definitive Agreement” shall mean a legally binding agreement setting forth the terms and conditions and other provisions relating to any transaction. All of the information contained in the Presentation is subject to further modification and any and all forecasts, projections or forward-looking statements contained herein shall not be relied upon as facts nor relied upon as any representation of future results which may materially vary from such projections and forecasts. You should obtain your own independent advice on the accounting and tax aspects of the proposed solution outlined in this Presentation. You agree that you are not relying and will not rely on any communication (written or oral) of Orvexa Technologies Inc. (“ORV”) as investment advice or as a recommendation to enter into any transaction, and that you are capable of assessing the merits of and understanding (on your own behalf or through independent professional advice), and should you enter into a Definitive Agreement with ORV, you will do so because you understand and accept, the terms and conditions and risks (including but not limited to economic, competitive, operational, accounting and tax risks) of such transaction. ORV does not in any way warrant, represent or guarantee the accounting or tax results of the transaction described in the Presentation nor does it hold itself out as a legal, tax or accounting advisor to any party. Nothing contained herein is in any way intended by ORV to offer, solicit and/or market any security or any securities related product which ORV is otherwise prohibited by United States, or any other applicable laws, rules, regulations, or guidelines from offering, soliciting, or marketing.

Precision Trading. Institutional Control. Modern Architecture.

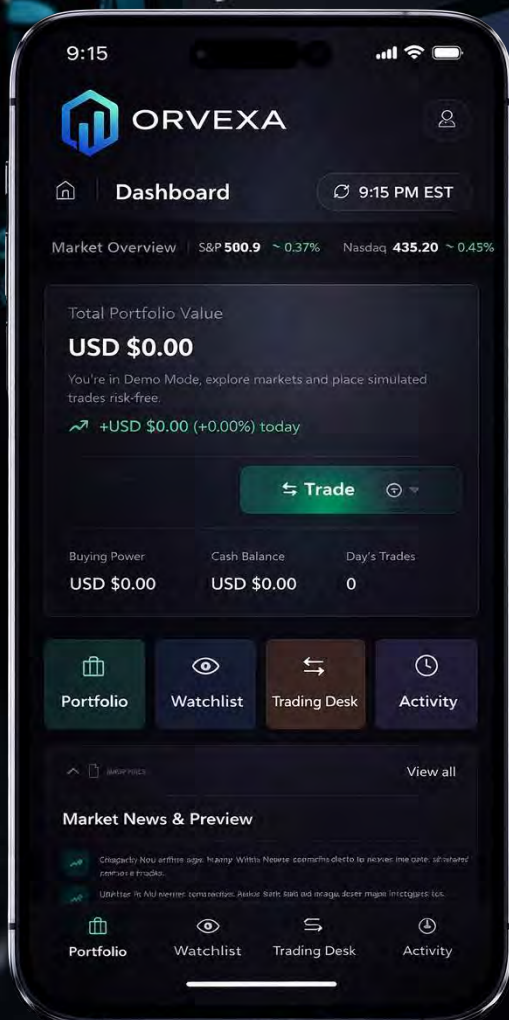

Orvexa is a next-generation trading platform engineered for professionals, institutions, and sophisticated market participants seeking compliant, high-performance trading technology without compromise.

Built with a compliance-first architecture and institutional-grade design, Orvexa bridges modern UX with regulated brokerage infrastructure.

How Orvexa Operates

Orvexa was created in response to a widening gap between consumer trading applications and the standards expected by professional capital. Orvexa is not a broker-dealer; regulated onboarding, custody, and execution are handled through licensed brokerage infrastructure.

As markets evolve and expectations increase, Orvexa positions itself as a disciplined alternative, prioritizing structure, visibility, and long-term reliability. The platform emphasizes clear information hierarchy and controlled workflows, enabling users to focus on decision-making rather than interface noise. Orvexa is designed for consistency, accountability, and responsible participation in modern markets.

A premium trading experience built for clarity, control, and confidence.

Professional-grade trading platform with real-time market data, advanced analytics, and bank-level security.

Precision Execution, Built Into the Workflow

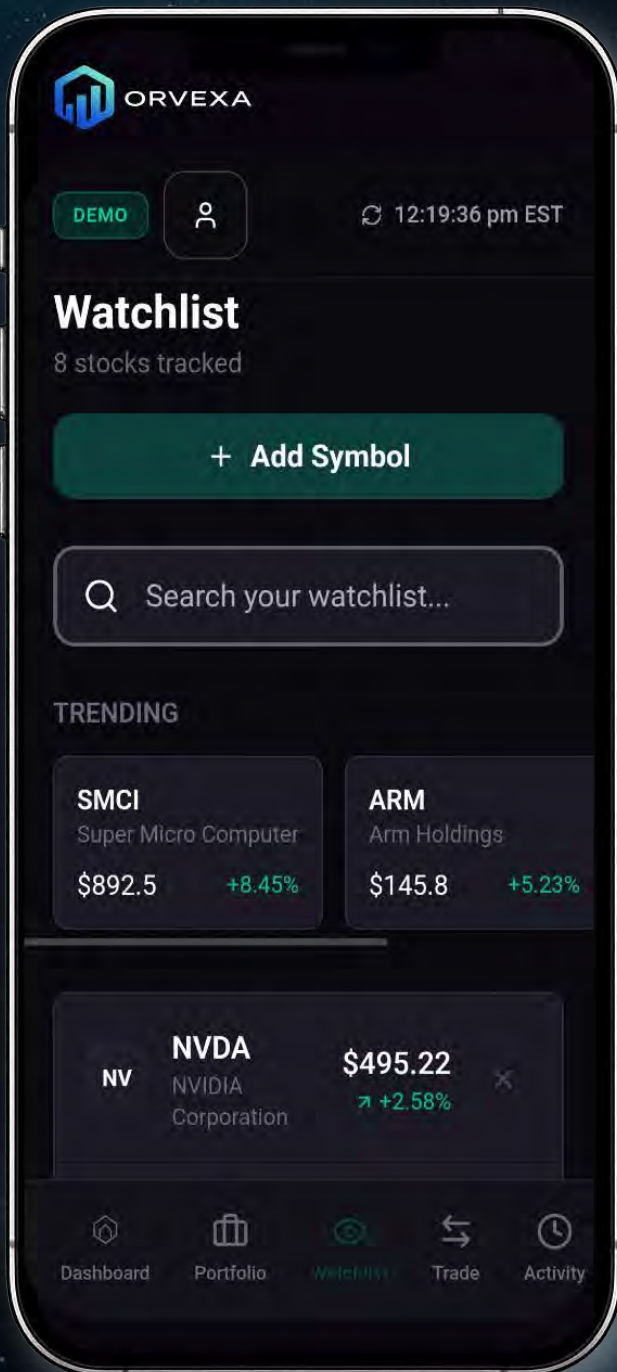

- Institutional-grade order entry built for speed, clarity, and error reduction
- Side-by-side workflow: symbol selection, chart visibility, and order summary in one view
- Streamlined trade setup for market and limit orders with guided inputs
- Real-time session status and order context displayed alongside execution controls
- Clean, consistent UI designed to reduce cognitive load during fast decision cycles

Trade With Context, Not Noise

Orvexa surfaces what matters: market news, drivers, and real time chart signals directly inside the dashboard flow.

Mobile Watchlist (Institutional UX)

Orvexa's watchlist experience on mobile is built to match the expectations of professional users: clean hierarchy, strong contrast, and a layout designed for rapid scanning. Instead of overwhelming the user with clutter, the interface highlights what matters: the symbol, the current price, and the move, so attention stays on market action.

Core Experience

- Users can build and maintain a focused list of symbols they actively track
- Search functionality reduces friction when lists grow
- Trending cards help surface active names and market attention
- The interface supports a fast “check in” workflow: open, scan, and move on
- Consistent navigation keeps the experience predictable across the platform

Outcome: a premium mobile market monitoring layer that keeps users engaged, informed, and ready to act.

Build a focused watchlist, track real-time movement, and stay aligned with your strategy before execution.

Charting Built for Clarity

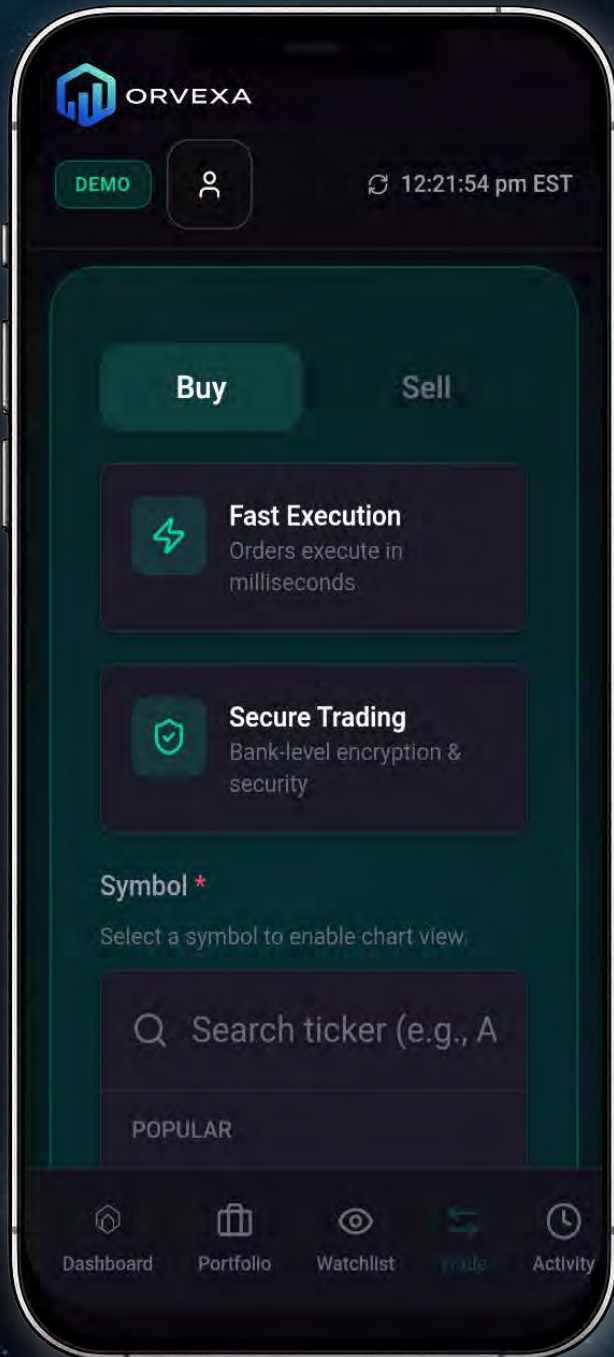

Orvexa's charting experience is designed to support disciplined analysis and faster decisions. Clean hierarchy, high readability, and real-time responsiveness help traders identify trend, momentum, and key levels without distraction.

- Multi-timeframe visibility with professional layout
- Clear price action and level recognition
- Built for focus during extended market sessions

Mobile Trade Execution (Institutional Control)

Orvexa's mobile trade execution experience is designed to deliver speed, confidence, and control in live market conditions. The interface emphasizes clarity and intent, guiding users through the trading process without distraction while preserving the precision required by professional and institutional traders.

The buy and sell workflow is streamlined to reduce friction and decision latency. Clear visual cues, structured inputs, and responsive feedback ensure that orders can be reviewed and submitted with confidence. Performance indicators reinforce execution speed and platform reliability, while the layout maintains focus on the action being taken.

Core Experience

- Fast order execution optimized for real time market conditions
- Secure trading environment using bank level encryption standards
- Clear separation between buy and sell actions to reduce error risk
- Integrated symbol search and selection for efficient trade setup
- Consistent navigation and visual hierarchy across mobile and desktop

Outcome: a premium mobile execution layer built for speed, security, and control.

OPERATING MODEL

Platform Structure & Flow

USER

Self-directed individual or institutional participant
Initiates trading decisions and platform interactions

ORVEXA PLATFORM

User interface, analytics, charting, watchlists,
and trade workflows.
Portfolio visualization and order instruction management
Non-discretionary, execution-only user experience

LICENSED BROKERAGE INFRASTRUCTURE

Account creation and identity verification (KYC / AML)
Custody, clearing, and settlement
Market access and trade execution
Regulated broker-dealer operations

FINANCIAL MARKETS

Equities and supported asset classes
Executed trades routed through regulated venues

Key Operating Principles

- Orvexa is not a broker-dealer.
- All regulated activities are performed by licensed brokerage partners.
- Users retain full control over trading decisions at all times.

TARGET USERS & USE CASES

Technology Stack

Application Platform

Orvexa is built as a modern, cloud-native trading platform designed for performance, scalability, and reliability across desktop and mobile environments.

Frontend

- React-based web application with a component-driven architecture
- Next-generation routing and rendering for fast page loads and smooth navigation
- Responsive layout optimized for professional desktop use and full mobile functionality
- Institutional-grade design system with consistent spacing, typography, and controlled motion

Backend & Application Logic

- Node.js-based API layer handling platform logic, state management, and environment controls
- Modular service structure designed to support feature expansion and partner integrations
- Clear separation between platform logic and brokerage execution workflows

Data Layer

- Relational database architecture (PostgreSQL or equivalent)
- Structured data models supporting portfolios, transactions, audit history, and user state
- Designed for integrity, traceability, and future reporting requirements

Brokerage & Market Infrastructure

- Integration with licensed a U.S. brokerage infrastructure
- Brokerage partner manages:
 - Account creation and KYC/AML
 - Custody and clearing
 - Market access and execution
 - Orvexa remains a non-discretionary, self-directed trading platform

Security & Environment Management

- Environment-separated configuration for Demo, QA/Simulator, and Live readiness
- Secure credential handling and API key management
- Controlled error handling and guardrails to prevent noisy failures

Cloud & Deployment

- Cloud-hosted infrastructure with environment-based deployments
- Version-controlled releases supporting iterative development and staged rollouts
- Built to support institutional uptime expectations and future enterprise use
